Subhalakshmi Kandavel

Python Packages

- A python package is a set of python code libraries which can be used in python project
- Packages can be downloaded using Python package manager `PIP` through command line interface
- Refer to [Installation — pip 20.2.3 documentation](#) for installation and detailed instructions
- Refer to [Installing Packages](#) for package installation using `PIP`

Learn and Practice Python

- [jerry-git/learn-python3](https://github.com/jerry-git/learn-python3) (recommended for practice)
- [A Beginner's Python Tutorial/Very Simple Programs](#)
- [The Hitchhiker's Guide to Python](#)
- [Python Examples](#)
